

COVID-19

CUSTOMER SAFETY GUIDELINES

Use hand sanitiser when entering premises.

Wash your hands - soap or alcohol hand gel can kill the virus.

Maintain social distancing by keeping separated by 2m.

Follow arrows on the floor to help maintain social distancing.

Customers in the reception area or retail store must wear face coverings but they are not required when accessing their storage space.

Customers showing any symptoms of the virus should not be permitted anywhere in the store.

Cover your mouth and nose when coughing or sneezing - ideally with a tissue - and wash your hands afterwards, to prevent the virus from spreading.

We regularly clean all areas and surfaces with approved cleaning products.

This policy is continually being monitored according to current Government guidelines.

All customers are encouraged to play their part in helping maintain COVID-19 safety guidelines
